

# WPR Generations Diagram

## Non-Archival (NA)?? Audio-Other (AO)??

Downloaded programs or sound files not produced by WPR and not necessarily in BWF format, but saved in the WPR library for use by staff in WPR programs and special projects

Recommendation : All digital masters should be saved in the BWF format with the appropriate metadata according to WPR best practice, with a CHECKSUM performed on the data portion only of the file. A single .mp3 access copy will be made for each preservation and production master (CP, CR), and archived with its corresponding .wav file on the server. 2 total copies of the entire archive should be saved in 2 separate locations outside of the repository.
